Providing Solutions

urbana

INNOVATION
DEVELOPMENT
RENOVATION

Urbana IDR has gained an important “*know-how*” in the field of rehabilitation for over 12 years, looking for innovation and development of solutions for all types of buildings.

It was born in a region where the huge historical heritage merges with the growing urban development; URBANA IDR faces the renovation of buildings with innovative techniques, projecting our expertise worldwide.

INTEGRATED SOLUTIONS

INNOVATING IN REHABILITATION

- Structural Repair and Reinforcement.
- Special Foundations and Underpinning.
- Consolidations, Props and Emergency Shoring.
- Infrastructure Repair (tanks, bridges, pipelines ...).
- Technicians on Cladding and Special Flooring.
- Waterproofing Roofs and Sealing Basements.
- Solutions for improving the energy performance of Buildings.
- Hotel Facilities Renewal.
- Upgrades and Industrial Installations Repairs.

Urbana IDR belongs to the Club Dir BASF Construction Chemicals, ARPHO (Association of Repair and Protection of Concrete Reinforcement QN Dupont Corian's Quality Network among other associations).

VENTILATED FACADES

URBANA IDR has managed to develop and improve until achieving a high specialization in positioning ventilated facades systems. This system also provides great flexibility in solutions and promptly finishes, as well as, improving energy efficiency in buildings.

*“Preserving
the past,
Consolidating
the future”*

HISTORICAL HERITAGE

We are a European company, heiress of professional initiatives which, in the mid-60s, arise on this continent for the preservation of our architectural heritage.

In coordination with archaeologists and restorers, we work in an activity that requires highly skilled technicians to intervene in vulnerable and protected buildings by law.

INFRASTRUCTURE AND CIVIL ENGINEERING

The construction and maintenance of the infrastructures are essential for economic and social development. Urbana IDR offers the preservation, which includes, both road-character (roads, bridges, tunnels, etc..), as well as, works addressed to the conduction of energy sources, gas and electricity.

The water and the technology for handling, occupies a high place in our catalog of works undertaken, backed up by the confidence placed by very prestigious companies.

“Added
Value”

“WE MOVE
COMFORTABLE
FACING COMPLEX
AND CHALLENGING
PROJECTS”

HOUSING

The technical profile of IDR Urbana, along with the working system developed by our team, allows us to execute works of residential construction, providing **added-value solutions** both in the organization and the execution of the works.

The construction costs, timing, and the execution of construction solutions without any further incidents, are parameters that our work aims in all our projects.

“Action in Emergency Areas”

We are proud of our interventions in emergency situations. We have a very professional and human team, capable of being available, either in public or private agencies, to manage crisis scenarios. Moreover, they can restore any place where the infrastructure has been damaged.

LORCA EARTHQUAKE (SPAIN)

On 11th May 2011 a seismic movement, measure 5.1 magnitude on the Richter scale, shook this city in southeastern Spain. The fateful balance left nine dead and 324 wounded. Earthquake damages 80% of the buildings, including its rich cultural heritage.

With a very **FAST REACTION** Urbana IDR, together with a technical team, available to emergency units, has travelled to Lorca within hours.

HUMANITARIAN COOPERATION

URBANA IDR heads an emergency technical committee for inspection, shoring and / or evacuation of homes affected.

RECONSTRUCTION WORK

Urbana IDR creates a stable working group in place, which acts on thirty buildings.

RESTORING HERITAGE

Lorca has recognized its town as “*historical artistic*” with buildings dating back to the fifteenth century. Urbana IDR simultaneously involves in restoration of 13 buildings.

HAITI EARTHQUAKE

The effects of the devastating earthquake in Haiti in January 2010 are slow to correct. Urbana de Exteriores travelled to Haiti in November 2011 and participated in the reconstruction in collaboration of with the ONG: Action Fire firefighters.

BUSINESS RESPONSE

Urbana IDR is a firm for business purposes, but through the initiative of its technical set lines, works with social and humanitarian organizations. It is a form of social exchange in partnership and the acquisition of a very valuable knowledge.

IMPLEMENTATION OF NEW SYSTEMS

The experience gained in improving all types of buildings and areas , and the intense work in emergency, URBANA IDR has turned to the development and research of products, which will be applied to improving the lives of the needy. The result of this is the development of low cost deployable shelters to be installed in camps.
